ACKNOWLEDGEMENTS

Special recognition is due to my colleagues at the Bilingual Education Service Center who have provided invaluable assistance in locating and gathering materials to be included in this publication: to Yolanda Rosés López, who prepared the section on preschool materials; to Roméo C. Gatán, for his contributions to the section on teacher references; and to our director, María Medina Swanson who collected many valuable professional books and most of the materials on Puerto Rico.

A very special word of thanks is due to Natalie Vásquez of the BESC supportive staff for the many hours spent ordering, cataloguing, and classifying the materials listed here. I would also like to thank Mónica Bustamante for her help with the card catalogue, Frances Mitchell for typing the manuscript, and Carmen Vázquez for her help with the layout.

FOREWORD

Two years ago, when state funded bilingual programs were just beginning in Illinois, there was one question which bilingual teachers raised with plaintive desperation. What materials are available to teach math/science/social studies/cultural heritage/language arts in Spanish? The gloomy response seemed to be that there were few adequate instructional materials available. On the other hand, we were reluctant to enjoin already overburdened classroom bilingual teachers with the formidable task of producing their own materials until we were certain there was no alternative.

The stack of accumulated catalogs and bibliographies of bilingual materials sent to the state office grew daily. But, as every teacher knows, you cannot go alone on the publication's title and catalog description. There seemed to be more materials available than we had suspected, but were they any good?

At this point we invited Mrs. Helen Alvarado, a bilingual consultant and former teacher, to review all of the available sources of instructional materials and to select those titles most promising for bilingual programs. She then examined over 90% of the materials themselves to doublecheck their potential usefulness. The object was not to "approve" titles, but rather to identify materials that some bilingual teachers might find useful. What's one man's meat, of course, is another man's poison. We were never deluded into thinking that all of the selected materials would be acclaimed by all teachers.

Mrs. Alvarado turned out to have been the ideal person for the task. Hard working and knowledgeable, she authored a draft last year which contained $12,000 worth of materials suitable for use in bilingual programs on the elementary level. This list has been expanded in the present publication to include about twice as many materials from preschool through 12th. grade. It has taken two years to compile. Teachers will find it a valuable aid in identifying suitable instructional materials. It puts to rest the myth that there are few adequate materials for bilingual programs.

To make this list even more useful to Illinois bilingual teachers, all of the materials referred to in the present publication are available for examination at the Bilingual Education Service Center in Mount Prospect. Substantial portions of these materials are also available in the Joliet elementary district's learning center, and through Chicago's three area curriculum offices.

What, a few short years ago, was a dismal situation in regards to instructional materials appropriate for Spanish-English bilingual programs, has now greatly improved. New materials are being published with greatly increased frequency. (And, of course, not all of the good current materials have yet been identified by the present listing.) An excellent way for teachers to keep up with the latest offerings is to visit the exhibitors booths at the national bilingual, foreign language, and TESL conferences. There remains a need for the reading level of the Spanish materials to more realistically reflect the reading level of children who have not attended school in a Spanish-speaking country, but who, rather, have been raised in the United States by Spanish-speaking parents.

We at the state office congratulate Mrs. Alvarado for her most useful guide to bilingual instructional materials, and we commend the Bilingual Education Service Center for their help in this task.

CURRICULUM

A PIAGET PROGRAM

Contents of the Program	Age Level	Distributor	Price
Early Childhood Curriculum consists of three kits of materials with a teacher's guide in Spanish and/or English and Dr. Lavatelli's new book. PIAGET'S THEORY APPLIED TO AN EARLY CHILDHOOD CURRICULUM. The three materials kits are titled, and cover the areas of CLASSIFICATION, NUMBER MEASUREMENT AND SPACE, and SERIATION. Most of the materials are actual objects rather than pictures of objects since research findings reveal that pictures are less effective than realia. Sufficient quantities of materials are provided in each set for up to six children to work together at one time.	3-5	Engineering	Complete $ 292.45

SERVICE

FILM SERVICE FROM THE PUBLIC LIBRARY

General Information

The Visual Materials Center of the Chicago Public Library lends 16 mm sound films, without charge, to groups organized and meeting in Chicago and having a membership of at least twenty-five. The films are not loaned for home use; nor may they be televised, shown for profit or fund raising.

Registration for Film Service

Before films may be reserved or withdrawn, an Application for Film Service, signed by the head of the organization, must be filed with the Visual Materials Center. If the organization is not listed in a printed directory, evidence of its existence (e.g., state charter, printed stationery) will be requested.

The head of the organization may list the names of several other adult members on the Application, and so authorize them to borrow films for the organization. Films will be issued only upon presentation of the PERSONAL library card of the head of the organization OR a member whose name is listed on the Application. The card of an authorized person may be used by a messenger or another individual responsible for picking up films. Registration for film service is for two years. If, however, the head of the organization changes within this period, a new Application must be signed by him and returned to the Visual Materials Center. Three months before a registration expires, notification of expiration and a new Application for film service are mailed to the person who signed the original Application.

Booking Films

Since films are in great demand, it is advisable to book them well in advance of the show date. Reservations may be made in person, by telephone, or by mail.

Period of Loan

Films are loaned for a three day period. They may be called for at the Visual Materials Center any time on the day for which they were reserved, and returned any time on the second following day on which the Library is open. The hours of the Visual Materials Center are: 9:00 AM - 9:00 PM, 5:30 PM on Saturdays. Films may not be reissued.

Overdue Films

It is imperative that films be returned on the day they are due. If they are not, the programs of other organizations may be disrupted. A fine of twenty-five cents an hour, or fraction thereof, will be assessed for each film returned overdue.

Film Damage

All films are inspected after every screening and are in good condition when loaned. The organization is responsible for the loss or damage of film in its possession and must bear the cost of repair and replacement. This charge will be determined by the Visual Materials Center.

PUBLIC LIBRARY FILMS - Chicago Public Library, 78 East Washington Street,
Chicago, Illinois 60602 (312) CE. 6-8922
